

I am a over the road truck driver and am very pleased with my xm radio because I can go anywhere in the USA and listen to my favorite chanel's without ever having to take my concentration of my driving by trying to find a good radio station in every area of the country that I go to. The traffic reports are very good for me because I can avoid backups and take a different way around to stay out of the way for the police to get there job done without me trying to get out of there way. The reports are constant and far as I can tell accurate. I do not mind paying for this service and think that I should be up to me wheter I want to have this and not the National Association of Broadcasters to tell me that I am not able to listen to this. I would like to urge the FCC to reject the MAB's petition 04-160 on this matter. thank you
